KAMENETSKAYA HOSPITAL ENLARGED
AFTER UNIFICATION

I. Korabel'nikov
Kamenevets, Brestskaya Oblast.

It was not until the recent unification plan that the rayon hospital at Kamenezets, Brestskaya Oblast, became important. Soon after the unification program went into effect, a polyclinic and gynecological consultation department entered the organization of the hospital with I. L. Dr yan as chief of the united hospital. Soon thereafter he was succeeded by Dr O. V. Vasil'chenko, and Dr T. Ye. Dostanko took over the administration of the ambulatory dispensary.

Much reorganization took place as a result of the unification. Several new departments were started, among them, department for surgery on purulent growths, a five-bed tuberculosis department, a laboratory, and an x-ray department. In the very near future, a special infection corps will be organized. It is also planned to establish a pent-mid-paraffin therapy department, and departments for other types of therapy.

Before the unification, the hospital's total staff consisted of one therapist and one surgeon. There are now six doctors and many more nurses and surgeon's assistants than formerly. The hospital's permanent staff is supplemented by traveling specialists. Thus, at quite frequent intervals, the hospital plays host to pediatricians, obstetricians, and doctors possessing some other specialty.

Doctors in the surrounding region are constantly using the hospital's laboratory facilities.
